# AS, Mechanical Engineering Technology Fairmont State University 5 Year Program Review Submitted Spring 2012

### **PROGRAM REVIEW** Fairmont State Board of Governors

X Program with Special Accreditation 🔲 Program without Special Accreditation

Date Submitted 2/15/2012

Program: Associate of Science, Mechanical Engineering Technology **Degree and Title** 

### INSTITUTIONAL RECOMMENDATION

The institution is obligated to recommend continuance or discontinuance of a program and to provide a brief rationale for its recommendation:

X 1. Continuation of the program at the current level of activity;

- 2. Continuation of program with corrective action (for example, reducing the range of optional tracks or merging programs);
- 3. Identification of the program for further development (for example, providing additional institutional commitment);
- 4. Development of a cooperative program with another institution, or sharing courses, facilities, faculty, and the like;
- 5. Discontinuation of the Program

**Rationale for Recommendation:** 

The Mechanical Engineering Technology program has maintained appropriate enrollments and graduates during the past five years. Classes offered as part of the program average 25 students per class during this same period. More importantly, this program utilizes the same assessment standards in place for the BSET degree in Mechanical Engineering Technology, and this program is accredited by the Board of Engineering and Technology (ABET). Currently, the AS program does not graduate a large number of students. This is a result of students matriculating into the BSET degree in Mechanical Engineering Technology. As a feeder program for the 4-year degree, the Mechanical Engineering Technology program does not require any additional resources. The program is supported by the same faculty, equipment, laboratories, and financial resources allocated to the baccalaureate program. The Mechanical Engineering Technology program is considered a quality program with excellent faculty, and this program is highly supported by the Dean of the College of Science and Technology at Fairmont State University.

### Executive Summary for Program Review

(not to be more than 2-3 pages)

Name and degree level of program Mechanical Engineering Technology – Associate of Science

External reviewer(s) TAC of ABET 2007-2008

Synopses of significant findings, including findings of external reviewer(s)

TAC of ABET identified several weaknesses and deficiencies in the Mechanical Engineering Technology program during their 2007-2008 visit. The main issue was the lack of an acceptable continuous improvement plan.

Plans for program improvement, including timeline

The Mechanical Engineering Program has implemented an acceptable continuous improvement plan since the spring of 2009. The plan was approved during the fall 2009 TAC of ABET revisit. The program will continue with the existing continuous improvement plan until the next TAC of ABET visit.

Identification of weaknesses or deficiencies from the previous review and the status of improvements implemented or accomplished

The TAC of ABET review during 2007-2008 did identify weaknesses and deficiencies; all have been corrected or resolved in the current program

Five-year trend data on graduates and majors enrolled

Within the past five years, the Mechanical Engineering Technology program has graduated approximately 11 students with an Associate's degree. This is an average of approximately 2 graduates per year. Over the past five years, program enrollment has increased slightly from approximately 15 to 20 students. Currently, the AS program does not graduate a large number of students. This is a result of students matriculating into the BSET degree in Mechanical Engineering Technology. As a feeder program for the 4-year degree, the Mechanical Engineering Technology program does not require any additional resources. The program is supported by the same faculty, equipment, laboratories, and financial resources allocated to the baccalaureate program.

Summary of assessment model and how results are used for program improvement

The Mechanical ET program utilizes a departmental Continuous Improvement Plan to meet institutional assessment needs. The Continuous Improvement Plan involves assessment and continuous improvement on three levels. The purpose of the Continuous Improvement Plan (CIP) is to identify, track, and remediate program weaknesses. The evaluation of competencies and program components leads to modifications of content, delivery, and other factors deemed instrumental in the pursuit of program improvement.

The CIP involves three levels of application. These levels include:

- Assessment of Program Objectives
- Assessment of Program Outcomes
- Program Modifications as determined necessary by the assessment practices.

Program Objectives are evaluated using various tools such as graduate surveys, employer surveys and a graduate competency exam. Benchmarks have been established for each of these assessment tools to determine program effectiveness. If data points within the results do not meet established benchmarks, an improvement plan is developed and implemented. Any modifications to the program objectives are approved by program faculty and the program's Industrial Advisory Committee.

Program Outcomes are evaluated using various tools such as course exams, assignments, quizzes, projects, labs, etc. Assessment points have been established for each course as they relate to the program outcomes. The program has established a benchmark in which 70% of the students in the course demonstrate competency. If less than 70% of the students cannot demonstrate success, a plan of improvement is established for the assessment point. These continuous improvement plans are approved by a collaborative agreement of the program faculty. An assessment matrix has been established to clearly define what assessment points are evaluated in each program course. The Mechanical Engineering Technology program has established an assessment cycle of three years. Each assessment point on the matrix will be assessed at least once every three years. Additional assessments shall be conducted if warranted.

All program modifications such as curriculum changes are established as a result the program objective and outcome assessments. Any significant changes must be approved by program faculty and the program's Industrial Advisory Committee.

Data on student placement (for example, number of students employed in positions related to the field of study or pursuing advanced degrees)

There is no data to confirm graduate employment in their field of study.

No graduates with only an AS, degree responded to the graduate survey. Most students that complete the AS degree also complete the BS, in Mechanical Engineering Technology. Final recommendations approved by governing board

# **PROGRAM REVIEW**

### Program Catalog Description:

Mechanical engineering technologists are concerned with the production, transmission and use of mechanical power and thermal energy. They also participate in the general design, maintenance and troubleshooting of mechanical components and assemblies (machines). The Mechanical Engineering Technology program at Fairmont State University prepares graduates for work in industry as an engineering technician or technologist where they may design, build, test, and/or maintain machines and mechanical equipment. The program is designed as a highly flexible 2 + 2 curriculum. Once the two-year degree is earned, the graduate may choose to enter the workforce or continue to study at the baccalaureate level.

### **Application/ Admission Requirements**

Students apply for admission to FSU through modern techniques by completion of an Application for Admission located on FSU's homepage at <u>www.fairmonstate.edu</u>. Once the student fully completes the application process, the student's application is reviewed for determination of admission.

Students seeking admission to Fairmont State University must be of the age of compulsory attendance in the state of West Virginia and file an application for admission. Applications and supporting credentials must be on file at least two weeks prior to the opening of a semester or term. All credentials submitted in support of an application for admission become the property of the University and will not be returned to the student. Any student admitted upon the basis of false credentials will be subject to immediate dismissal from the University.

Students who fail to register during the semester or term for which they have been admitted must file another application in order to gain admission at a later date. Separate applications for residence halls must be submitted to the Office of Residence Life. Any change in local address of any student at Fairmont State University must be reported to the Registrar.

The application for admission must specify the student's desired degree or program objective. Fairmont State University grants bachelor's degrees, and Pierpont Community & Technical College grants associate's degrees and administers certificate programs.

Admission to Fairmont State University does not guarantee admission to specific programs, which may be restricted due to limitations of staff, physical facilities, and space available for experiential training.

### **FAIRMONT STATE UNIVERSITY ADMISSION REQUIREMENTS** <u>FIRST-TIME FRESHMEN</u>

- 1. Application for Admission
- 2. Official high school transcript or GED (sent by high school or Department of Education) (2.5 GPA or higher)
- 3. ACT or SAT Scores (17 ACT or 830 Composite SAT[combination of critical reading and math scores])
- 4. College Transcript (if college credit was earned during high school)
- 5. Immunization Records (if born after January 1, 1957)
- 6. Statement of Activities (if out of high school more than six months)

### PLEASE NOTE: REQUIREMENTS CHANGED FOR FALL 2008

- The Following Units Were Required Beginning Fall 2008:
- **4 English** (including courses in grammar, composition, and literature)
- 3 Social Studies (including U.S. History)
- 4 Mathematics (three units must be Algebra 1 and higher)
- **3 Science** (all courses to be <u>college preparatory</u> laboratory science, <u>preferably including units from</u> <u>biology</u>, <u>chemistry and physics</u>)
- 1 Arts
- **2 Foreign Language** (Two units of the same foreign language)

Program courses	Five year cour Technology p	ngineering s provided below

	2220	20	14	16	0	18	17	
	2240	16	23	12	11	10	19	

The Mechanical Engineering Technology Program offers the following program courses:

### Mechanical Engineering Technology (College of Science and Technology)

### MECH 1100 Statics (3 hours)

The study of force systems that act on rigid bodies in static equilibrium. Topics of study include the analysis of coplanar and noncoplanar force systems using analytical and graphical methods. PR: MATH 1102, or 1115, or CR: MATH 1102.

### MECH 2200 Strength of Materials (4 hours)

The analysis of stress and deformation of deformable bodies under the action of forces. Students will examine the design and selection of tension and compression members, shafts and beams, stress and strain, Hook's Law, mechanical properties of engineering materials, torsion, bending and buckling theory. PR: MATH 1102 and MECH 1100 with a C or better in both.

### MECH 2210 Thermodynamics (3 hours)

An introduction to the thermodynamic laws of conservation of mass and energy. Students will explore applications in the analysis of energy sources, transformations and utilizations. PR: MECH 1100 with a C or better.

### MECH 2220 Fluid Mechanics (3 hours)

A study of the mechanics of fluid systems. Topics include fluid statics and dynamics, dimensional analysis and similitude, steady flow of incompressible fluids in pipes, ducts, and open channels, steady flow of compressible fluids over surfaces and about immersed bodies and turbomachinery. PR is one of the following: PR: MECH 2200, TECH 2290 or MATH 1185 or MATH 1190.

### MECH 2240 Machine Design (3 hours)

Application of the principles of mechanics to the design and selection of machine components. Topics of study include beams, columns, shafts, gears, bearings, belts, brakes, and springs. Design projects will be assigned and computer solutions will be utilized. PR: MECH 2200, COMP 1101 and either TECH 2290 or MATH 1185 or MATH 1190.

### Liberal Studies Requirements Met

The liberal studies requirements for the AS, Mechanical Engineering Technology are fulfilled through the completion of the following courses:

MATH 1102, PHYS 1101, PHYS 1102, COMP 1101, ENGL 1104, ENGL 1109, COMM (2200 or 2201 or 2202), ECON 2200

Assessment Requirements: The Mechanical Engineering Technology Program has successfully implemented a Continuous Improvement Program that ensures program outcomes and objectives are effectively evaluated and achieved. The complete Continuous Improvement Program is attached as Appendix A. These assessment practices have been thoroughly reviewed and approved by TAC of ABET. In addition, these assessment practices have also been established by the programs Industrial Advisory Committee.

### Summary of Continuous Improvement Plan (Assessment Practices)

The ABET Accredited Programs at Fairmont State University use a Continuous Improvement Plan (CIP) designed and approved by selected program constituencies [faculty and the Industrial Advisory Committee (IAC)]. The CIP is a dynamic program used for assessing established objectives and outcomes along with procedures for implementation of necessary modifications to academic programs. The changes are presented to the programs' IACs for comments, recommendations, and approval.

The CIP Assessment Diagram (Figure 1, shown on the following page) illustrates the three assessment levels for the ABET Accredited Programs. The overall program assessment (Level 3) includes the scheduled review of the CIPs from the Program Objectives and the Program Outcomes. Since these two techniques differ slightly, reference to Program Objectives assessment specifications found in Section II of the plan and Program Outcomes assessment specifications found in Section III of the Continuous Improvement Plan are necessary.

Again, the CIP includes three levels of assessment: The Program Objectives (Level 1), the Program Outcomes (Level 2), and the overall assessment procedure (Level 3). The first two levels (Program Objectives and Program Outcomes) include the following components for assessment completion:

- 1. assessment,
- 2. determination of weakness(s),
- 3. action to be taken once the weakness is determined,
- 4. solicitation of approval/recommendation to correct from the appropriate constituencies,
- 5. implementation of change/modification to the Program Objectives (Level 1) or the Program Outcomes (Level 2) which can bring about overall change (Level 3) to the ABET Accredited Programs.

The remaining sections of the CIP allow for closing the loop regarding Program Objectives and Program Outcomes.

In Level 3, assessment is achieved by recommending and implementing academic program changes initiated by the constituencies' (Faculty and IAC members) review of the assessed Program Objectives and Program Outcomes.

The CIP is implemented at the freshman level and continues into post-graduation activities. g e

Appendix A contains a copy of the complete Continuous Improvement Plan for all ABET Accredited programs in the Department of Technology.

MECH 2220: Fluid Mechanics	Spring 2009	16

### Graduation/Retention Rates

### **Graduate Data:**

Over the past five (5) academic years, the Mechanical Engineering Technology, AS program has averaged 2 graduates per year. Currently, the AS program does not graduate a large number of students. This is a result of students matriculating into the BSET degree in Mechanical Engineering Technology. As a feeder program for the 4-year degree, the Mechanical Engineering Technology program does not require any additional resources. The program is supported by the same faculty, equipment, laboratories, and financial resources allocated to the baccalaureate program.

Academic Year	Number of Graduates
2006	1
2007	5
2008	1
2009	3
2010	0
2011	1

### Previous Program Review Results

The previous program review for Mechanical Engineering Technology Program was submitted using the ABET program review self-study report format. The results of this ABET review indicated that all current practices, assessment methodologies and resources were sufficient for the maintenance of a successful Mechanical ET program.

As a result of the TAC of ABET revisit in fall 2009, the Mechanical Engineering Technology program received full accreditation without any program deficiencies or weaknesses.

A copy of the full approval and approval dates on the ABET website is provided as Appendix C for reference purposes

# ADEQUACY (§ 4.2.4.2)

### Program Requirements:

Electives	min 21	0_hrs	
TOTAL	max 128	_67_hrs	

Programs not meeting the above requirements must request a continuation of their exception with a justification below:

Due to program mandates by the accreditation criteria (TAC of ABET) the Mechanical Engineering Technology program does not have the flexibility to permit students to complete 21 credit hours of free electives. This exception has been approved within the institution in order to maintain national accreditation approval. Faculty Data

The Mechanical Engineering Technology Program at Fairmont State University maintains two (2) full-time faculty members.

### Full -- time Faculty:

Jason D. Bolyard, Assistant Professor, Program Coordinator

Hugh Costello, PE, Assistant Professor

A faculty data sheet has been completed for each faculty member and provided in Appendix B of this document.

Accreditation/national standards

The Mechanical Engineering Technology Program obtained full accreditation under the Technology Accreditation Commission (TAC) of the Accreditation Board for Engineering and Technology (ABET) after a complete program review in 2007. The recognition of this accreditation allows students to sit for the Fundamentals of Engineering Exam in West Virginia.

A complete copy of the TAC of ABET Criteria is provided as Appendix D of this report.

### Placement and Success of Graduates

Below is a summary of graduates and placement. No graduates with only an AS, degree responded to the graduate survey. Most students that complete the AS degree also complete the BS, in Mechanical Engineering Technology.

### Similar Programs in WV

Several institution in West Virginia offer similar programs. Similar program offerings are listed below:

- Bridgemont Community and Technical College, Associate of Science, Mechanical Engineering Technology
- Bluefield State College, Associate of Science, Mechanical Engineering Technology

### CONSISTENCY WITH MISSION (§ 4.1.3.4)

Fairmont State University has established the following mission statements:

**MISSION STATEMENT:** The Mission of Fairmont State University is to provide opportunities for individuals to achieve their professional and personal goals and discover roles for responsible citizenship that promote the common good.

**VISION STATEMENT:** Fairmont State University aspires to be nationally recognized as a model for accessible learner-centered institutions that promote student success by providing comprehensive education and excellent teaching, flexible learning environments, and superior services. Graduates will have the knowledge, skills, and habits of mind necessary for intellectual growth, full and participatory citizenship, employability, and entrepreneurship in a changing environment.

### College of Science and Technology's Mission:

Our mission is to promote effective student learning in science, math and technology and to prepare top-quality graduates for their future endeavors, including graduate study, employment or other personal goals.

### Mechanical Engineering Technology Program Objectives:

The Program Objectives, as determined by the Mechanical Engineering Technology Program's constituencies are intended to dynamically promote professional competencies and continued professional growth.

Below are the Program Objectives for the Mechanical Engineering Technology program at Fairmont State University.

Students and graduates shall, to varying degrees, be competent in;

1	applying academic competencies and methodologies in addressing and solving
	problems as a professional.
2	using learned technical and non-technical methodologies to communicate to audiences
	of varying demographics.
3	ethically and respectfully performing professional responsibilities as part of a team and
	or multidisciplinary team.
4	recognizing and assessing the societal and global impact of professional decisions and
	practices.
5	pursuing lifelong learning through professional development.

### **University's Mission & Program Objectives**

The Program Objectives are designed to address the professional competencies and development of students and graduates as well as emphasize the continued improvement and evolution of the individual after his/her exit from Fairmont State. Fairmont State's mission emphasizes the same desires and standards for students of the University.

In comparing Fairmont State's mission and core values to the Mechanical Engineering Technology Program's Objectives, the consistencies are easily discernible. The mission of the University advocates three goals. These goals are; provide opportunities for individuals to achieve **professional goals**, provide opportunities for individuals to achieve **personal goals**, and provide opportunities for individuals to discover **roles for responsible citizenship** that promote the common good. These goals are further explained through relating the adopted core values.

The first goal of professional development incorporates the core values of scholarship, achievement and responsibility. The Program Objectives 1 through 5 directly link to this goal and these values through the professional development of the students via academic competencies in the field of mechanical engineering technology, emphasis on effective communication skills, advocating team work, recognizing the importance of global and societal impact of the profession, and the importance and benefits of lifelong learning.

The Program Objectives foster professional growth through mandating that students successfully apply academic competencies and methodologies in addressing and solving problems. This is evaluated through an exit exam, and tracking the post-graduate to determine level and competency of work performance.

The second goal of the Mission is the opportunity for attaining personal goals. The Program Objectives indirectly advocate personal development through intrinsic motivators such as communication skills, team work skills, global and societal emphasis and a desire for lifelong learning. Progress in any of the aforementioned areas can assist in achieving personal goals.

Lastly, the Program Objectives can link directly to the goal of providing opportunities for individuals to discover roles for responsible citizenship that promote the common good. This matches the goal of two of the program's objectives which involves the performing of work ethically and respectfully and recognizing the social and global impact of decisions.

### Relationship with Other Programs

The Mechanical Engineering Technology program has an excellent relationship with the other technology programs due to the coordination of various ABET activities adopted by all ABET programs. This includes partnerships of guest speakers, and a lecture series.

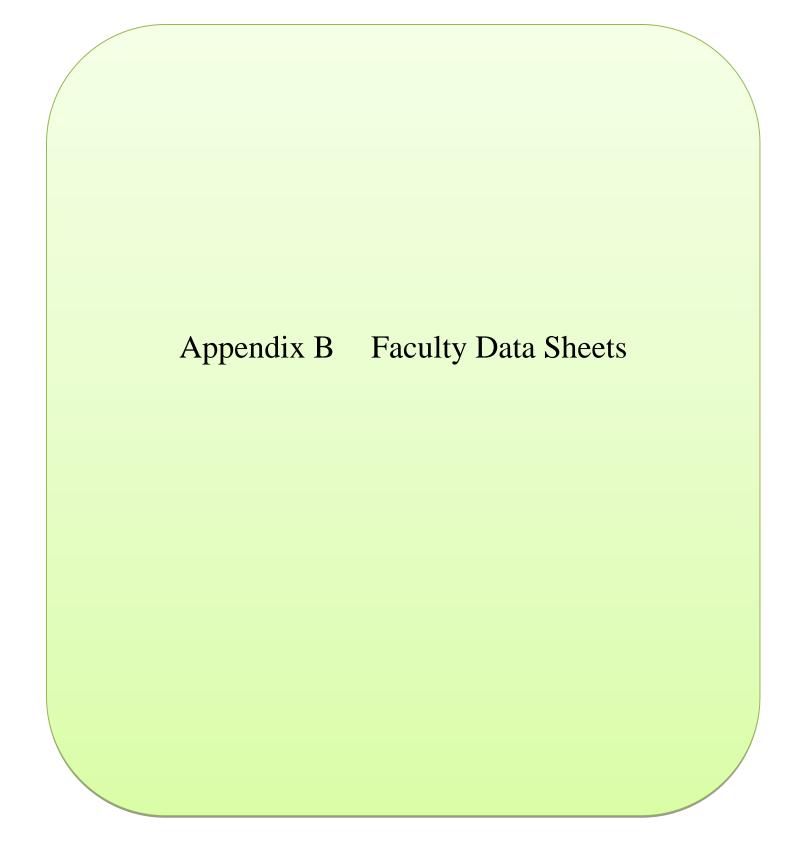

The Mechanical Engineering Technology program offers several service courses that serve several programs. Students in Civil Engineering Technology, Occupational Safety, and Architecture all complete courses provided by the Mechanical Engineering Program. The program's faculty members also deliver course in other disciplines as needed. These courses include TECH 2290 Engineering Analysis I and TECH 3300 Engineering Analysis II.

Signatures and Recommendations

The required sheet with signatures and recommendation is provided on page 1.
