# **Executive Summary for Program Review**

(not to be more than 2-3 pages)

#### Name and degree level of program

Community Health Education, Bachelors of Science, undergraduate

#### **External reviewer(s)**

The Community Health Education program was reviewed by Dr. Adrienne Payne-Andrews, PhD. She is an independent consultant in health, wellness, and fitness. Her comments follow:

"It is the opinion of this reviewer that the Community Health Education curriculum at Fairmont State University is strong. Courses align with mission of the program and taken together address key areas of responsibility for community health education specialists. Course descriptions clearly identify student outcomes and describe knowledge, skills and experiences that will be gained. In addition, the curriculum provides a variety of learning experiences from the classroom to hands-on opportunities to work with community agencies."

#### Synopses of significant findings, including findings of external reviewer(s)

The Health Science program was revised to a Community Health Education program in the Spring 2013 semester (Curriculum Proposal #12-13-33). The Health Science program was not aligned with national standards, nor did it have a clearly defined focus. The Community Health Education program and new courses are aligned directly with nationally vetted standards. A Community Health Education degree allows our graduates to: take the Certified Health Education Specialist (CHES) exam with the National Commission on Health Education Credentialing, work in public health settings, and be prepared for graduate studies.

#### Plans for program improvement, including timeline

After Curriculum Proposal #12-13-33 was approved, courses in the new program were offered, and the program was refined. In Fall 2014, Curriculum Proposal # 14-15-01 was drafted to include revisions to the Internship and the minor. This proposal was approved. A Curriculum Proposal for the 2015-2016 academic year has been developed, and is currently under review. The present Curriculum Proposal's purposes are to address the loss of Nutrition courses that had been provided by Pierpont Community & Technical College, create majors-based research courses, and reorganize pre-requisites for the major. In December 2015, a graduation survey was deployed. Additional plans for program improvement include completing a comprehensive program review in August 2016 in order to compare the program to Council on Accreditation for Public Health (CEPH) standards. The rationale for setting August 2016 for a comprehensive review is that by this time, each class will have been offered at least one time. Each semester, course learning outcomes are reviewed, and recommendations are written.

# Identification of weaknesses or deficiencies from the previous review and the status of improvements implemented or accomplished

The previous Health Science program review identified the following weaknesses:

- 1. The Health Science program had not been revised in over 10 years. STATUS: The Health Science program was revised and re-named Community Health Education Spring 2013
- 2. The external reviewers from the previous review wrote that using courses that were housed in other academic units were not focused on developing skills in community health. STATUS: Six new Community Health Education courses were designed and approved in the Spring 2013 semester. The present Research courses offered by Exercise Science faculty and the present Nutrition courses offered by Pierpont Community & Technical College are the focus of a current Curriculum Proposal whose intent is to have those courses offered in-house.

#### Summary of assessment model and how results are used for program improvement

The Community Health Education program uses TaskStream in order to archive important program material, store evaluation results, and house program recommendations. The Community Health Education has three explicit program goals. These are based on enrollment patterns, post-baccalaureate placement, and preparation for the Certified Health Education Specialist credential. The program has seven program outcomes, based on the Areas of Responsibility for Health Educators established by the National Commission on Health Education Credentialing (NCHEC). Each program goal and outcome is evaluated annually, after the conclusion of each academic year's Spring semester. A comprehensive program reviewed

based on the NCHEC Areas of Responsibility and CEPH standards is expected in August 2016. Recommendations for each annual review are incorporated into the following year's program plan.

# Data on student placement (for example, number of students employed in positions related to the field of study or pursuing advanced degrees)

In Fall 2015, a survey of the previous 10 years' Health Science and Community Health Education graduates was deployed via electronic survey (2 respondents) and by postal mail (7 respondents). Two respondents included the two Community Health Education graduates, and the remaining seven represented Health Science graduates. When asked, "Are you currently employed in a position that requires use of your undergraduate degree?" all of the Health Science graduates responded "no." However, they indicated they are employed in occupations such as insurance claims (WVU Medicine), Charleston Area Medical Center, opthamalogy, owner of a fitness company, and lab science. One of the two Community Health Education graduates is employed by WVU Extension (Nutrition), and the other Community Health Education graduate is employed as a teacher/counselor at Presley Ridge School.

## **PROGRAM REVIEW**

FAIRMONT ST	FAIRMONT STATE UNIVERSITY OR PIERPONT COMMUNITY AND TECHNICAL COLLEGE				
Program: Community Health Education (formerly Health Science)					
School:	School of Education, Health & Human Performance				
Date:	February 1, 2016				

#### **Program Catalog Description:**

#### Catalog Description:

The School of Education, Health and Human Performance offers a Bachelor of Science in Community Health Education and also a minor for students interested in pursuing a career in this area.

#### Website Description:

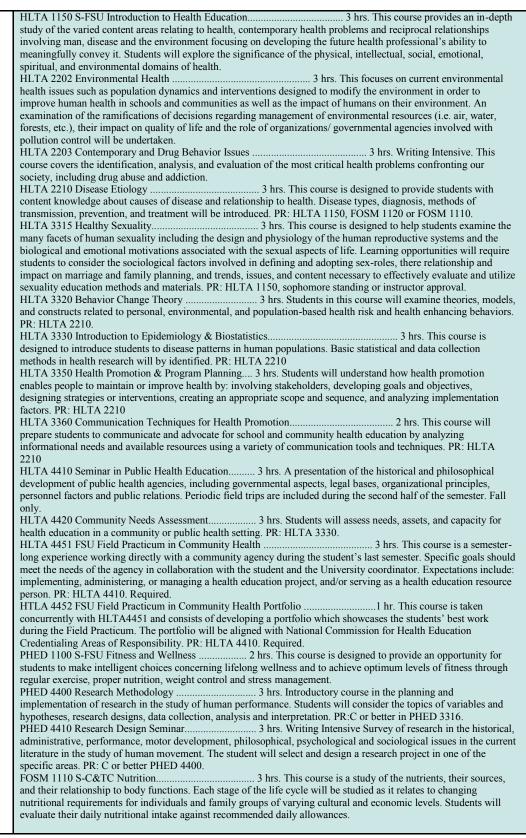

The Bachelor of Science degree in Community Health Education provides students with the knowledge and skills to work in community-based programs. The focus of the degree is to prepare health education specialists who can assess needs, plan and implement programs, conduct research, communicate health information, and serve as a health education resource person. Courses are designed with hands-on learning in mind. Students will participate in projects where they are meeting a community's health needs. This degree program requires an area of emphasis outside the major so students may focus on a specific area of interest, such as exercise science, nutrition, psychology, and sociology.

Checklist

Program Report Section	Present	Not Present
Mission Statement	X	
Program Goals	X	
Program Outcomes	X	
Measures for Goals	X	
Measures for Outcomes	X	
Findings for Measures	X	
Recommendations	X	

# Questions from your review:

It looks like you use rubrics for the measures/activities. Do you plan to post them in Taskstream?

Do you think you can consistently assess, and report a total of 10 goals and outcomes?

Are your outcome descriptors actually a list of program objectives? Do you think you could convert them into a simpler outcome statement?

What I learned from the report that I can take back to and apply in my own academic program assessment process:

A well-articulated assessment plan makes a big difference for an external reviewer. I am not supposed to evaluate this program as a reviewer, but I was impressed by the thoroughness.

#### Adjunct use

Within the Community Health Education program, two adjuncts teach sections of Environmental Health and Introduction to Epidemiology & Biostatistics. All other courses within the major are taught by full-time faculty.

#### **Graduation/Retention Rates**

#### **Previous Program Review Results**

The previous program review identified two areas that needed to be addressed. These were the need for better preparation for graduate school preparation and additional coursework specific to skills needed in the field of community health. Recent curriculum proposals have addressed the creation of Research courses for Community Health Education majors, the addition of courses such as Introduction to Epidemiology & Biostatistics, Health Promotion & Program Planning, and Community Needs Assessment.

# **Faculty Data**

Faculty Data Sheets: See	Table 3 Dr. Amy Sidwell	& Table 4 Dr. Janie Leary

### Accreditation/national standards

The Community Health Education is a non-accredited program. However, the program was revised to reflect standards established by the National Commission on Health Education Credentialing Areas of Responsibility for Health Education. A credentialing mechanism is available through Council on Accreditation for Public Health. In August 2016, a comprehensive program review will take place in order to compare our existing curricula with those requirements. One faculty member participated in a workshop on the CEPH accreditation process. Faculty and university leadership believe pursuing this accreditation may be cost-prohibitive, but will this issue will be discussed further in August 2016.

### **NECESSITY (§ 4.1.3.3)**

There is limited data on placement and success of graduates from the Health Science program, and as of Spring 2015, there were only two graduates with degrees in Community Health Education. In general, the Health Science graduates who responded to the survey indicated they needed additional training and education to pursue employment (e.g. insurance, opthomology, hospitals). Those respondents also indicated they wanted more exposure to the types of employment possible with a degree in Health Science. Although the Community Health degree requirements are relatively new, we believe we have addressed this issue by basing the program on standards in health education. The two graduates in Community Health in Spring 2015 are employed as educators in community-based settings.

Fairmont State University's Community Health Education is unique when compared to degree programs offered at other West Virginia state institutions. None of the other institutions offer a degree that is explicitly named Community Health Education. Further, none of the similar degree programs explicitly state their program was developed using the National Commission on Health Education Credentialing Areas of Responsibilities for Health Educators as a framework. West Virginia University's undergraduate degree program in Public Health approved in 2015 is housed within their CEPH accredited School of Public Health. Programs most similar as a comparison to Fairmont State include West Virginia State University (BS in Health Sciences with an emphasis available in Community Health Education) and Glenville State University (undergraduate degree in Health Promotion). Additional degree programs include Shepard University's Health Promotion and Exercise Science undergraduate, West Liberty's Community Education program (that is not specific to Community Health), Concord University's Master's of Arts degree in Health Promotion, West Virginia Institute of Technology's undergraduate degree in Health Services Administration, and Marshall University's Bachelor of Science in Health Sciences. Bluefield State University does not offer a comparable program.

CONSISTENCY WITH MISSION (§ 4.1.3.4)

The Mission of Fairmont State University is to provide opportunities for individuals to achieve their professional and personal goals and discover roles for responsible citizenship that promote the common good. The Bachelor of Science degree in Community Health Education provides students with the knowledge and skills to work in community-based programs. The mission of the Community Health Education program is to prepare health educators with the capacity to work in a variety of community health settings. Therefore, the Community Health Education degree program prepares students to meet professional and personal goals, while promoting the common good.

The Community Health Education program is housed within the School of Education, Health & Human Performance. Courses in Community Health Education serve the major, as well as the School Health Education major. Faculty in both programs are engaged in community and school-based service projects, and two Health Education faculty serve as liaisons to the Professional Development Schools collaborative. All Health Education faculty are housed within the Education building, and use classroom and storage space in the building. Each faculty member serves on university-wide committees. We have developed relationships across campus through our service activities. For example, as the fiscal agent of the Ford College Community Challenge, the Community Health program works directly with the College of Science and Technology and the School of Fine Arts. Additionally, a number of HLTA courses have been designated as General Studies courses, thereby serving students from a number of diverse academic programs.

#### Signatures and Recommendations

The required sheet with signatures and recommendation should be used as a cover sheet.

Table 3. Faculty Data Sheet. Dr. Amy Sidwell

Faculty Data

Name: Dr. Amy M. Sidwell, MCHES	Rank: Assistant Professor
Check One: Full time _x Part Time	Adjunct Grad. Asst
Highest Degree Earned: PhD Date De	egree Received: May 2009
Conferred by: West Virginia University, College of	Physical Activity and Sport Sciences
Area of specialization: Kinesiology/Physical Education	ion Teacher Education
Professional registration/licensure: Master Certified I	Health Education Specialist
Yrs. of employment at present institution: 4.5	
Years of employment in higher education: 10	
Yrs of related experience outside higher ed: 6	

Non-teaching experience: Community Health & Wellness Coordinator, Community Development Specialist for

To determine compatibility of credentials with assignment:

Substance Abuse Prevention

(a) List course you taught this year and those you taught last year: (If you participated in team-taught course, indicate each of them and what percent of courses you taught). For each course include year and semester taught, course number, course title and enrollment.

Year/So	<u>emester</u>	Course Number & Title	Enrollm	<u>ient</u>

- (b) If degree is not in area of current assignment, explain.
- My PhD in Kinesiology/Physical Education Teacher Education is well-suited to my role in the School of Education, Health & Human Performance in teaching entry-level Physical Education courses and graduate-level courses, as assigned, and in my role as a Professional Development Schools liaison. My Master's in Community Health Education from the West Virginia University School of Medicine was particularly helpful in preparing me to teach courses in our Community Health Education program. Additionally, I have an advanced-level certification from the National Commission on Health Education Credentialing.
- (c) Identify your professional development activities during the past five years.

  January 2016: Strategies for Supporting College Students with Autism. Fairmont State University.

#### **Total Number of Current Credits:**

86.5

- (d) List award/honors (including invitations to speak in your area of expertise) or special recognition in the last five years.
- 2014-2015 Fairmont State University Faculty Recognition Award Nominee
- 2014 Health Educator of the Year, West Virginia Association for Health, Physical Education, Recreation and Dance
- (e) Indicate any other activities which have contributed to effective teaching. Spring 2015 & Fall 2015: Fairmont State University: HLTA 4420 Community Needs Assessment. This is an undergraduate, senior-level course in which students: recall fundamental concepts of needs and capacity assessment; collect primary data and utilize secondary data to assess a community's health needs and capacity; employ assessment strategies when working with key stakeholders, individuals, or groups; prepare a report of needs and capacity assessment findings, taking into account the audience and health literacy of the readers; and, interpret results of the findings in order to recommend how the findings would be applied in a community setting. The Spring 2015 Needs Assessment examined student health and safety issues at Fairmont State University, and recommended the formation of a student wellness committee. The Fall 2016 Needs Assessment was completed with stakeholders in the City of Fairmont, and recommended programs in substance abuse prevention, physical activity, and nutrition.

Fall 2014 & Spring 2016: Fairmont State University: HLTA 3350 Health Promotion & Program Planning. This is an undergraduate Community Health Education course in which students understand how health promotion enables people to maintain or improve health by: involving stakeholders, developing goals and objectives, designing strategies or interventions, creating an appropriate scope and sequence, and analyzing implementation factors. This course requires service learning activities with the American Cancer Society and Fairmont Community Garden to meet course outcomes. Students are trained by the American Cancer Society as Community Health Advisors, and carry-out cancer prevention activities. They also work as Community Health Educators with Fairmont Community Garden. Fairmont State University has received a grant for \$25,000 from Ford Motor Company. Our grant is entitled, "Bridging the Gap: Sustainable Nutrition through Community Revitalization."

Spring 2013 & Spring 2014: Fairmont State University: PHED 6417 Impact of Exercise on Health and Disease. This is a graduate-level course focused on the role of exercise in the prevention and rehabilitation of cardiopulmonary diseases. There is an emphasis on patient/client education, programming, and assessment. This course has received grant funding through the West Virginia Campus Compact Link Grant. As a result of this funding, Fairmont State University has been designated as a partner with the National Institutes of Health and National Institute on Aging program.

Fall 2012 & Fall 2013: Fairmont State University: PHED 6418 Health Promotion and Wellness Programming. This course is designed to introduce students to the concepts and theories of wellness, how to conduct assessments and evaluations of individuals and programs, how to design a wide variety of health promotion programs and understand the model of behavior change. This course received funding through The Campus Community Link program. A portion of the course included a service learning component in which students worked directly with the Ritchie County Family Resource Network to: develop a needs assessment, implement health promotion programs, and develop program evaluation.

Sidwell, A.M. & Straight, H. (2012, August 29). Family Resource Network, Fairmont State team up for project. *The Pennsboro News*, pp. 1A.

(g) List externally funded research (grants and contracts) during the last five years. Spring 2015: Fairmont State University Professional Development Schools Competitive Grant Awards. Provided assistance to Blackshere Elementary School on grant proposal entitled, "Container and raised-bed edible gardens." The grant will fund the development of training modules to include direct instruction, hands-on practice, and collaborative research and planning to increase teacher competencies in their efforts to use gardening activities as curricular strategies. \$4,365.90. Fully funded.

Spring 2014-Summer 2015: Ford Motor Company College Community Challenge, "Bridging the Gap: Sustainable Nutrition through Community Revitalization." Prepared grant application with Fairmont State Technology Education, City of Fairmont, Fairmont State University Collegiate 4-H, and Fairmont Community Garden to request \$25,000 in grant funding. Fully funded.

Spring 2013: The National Institutes of Health, National Institutes on Aging provided support materials in-kind for a research project on home-based, physical activity in Ritchie County, West Virginia.

Spring 2013: Received \$343 from the West Virginia Campus Compact Link grant to conduct research on a home-based physical activity program developed by the National Institutes of Health, National Institutes on Aging.

Summer 2012: Received \$6000 from the West Virginia Campus Compact Link grant to: provide physical activity, substance abuse prevention, and nutrition programming; conduct a community health survey; develop a catalog of physical activity and recreation opportunities in Ritchie County, West Virginia; and, design a sustainability plan for program continuation.

Spring 2012: Secured travel funding for students to attend the 2012 West Virginia Alliance for Health, Physical Education, Recreation and Dance conference through the Fairmont State University Office of the Provost.
