Construction Update

WEEKLY REPORT:

- College Park Replacement
- Locust Ave Widening
- RCB Classroom HVAC Replacement
- Caperton Center Waterproofing
- MS4 Program

College Park Replacement

The new housing project will be constructed on the existing Practice Field Parking lot. New parking lots will be created where the current College Park Apartments are located. Bids are due on February 19th at 2:00 pm. Construction is to begin Spring 2015.

Locust Avenue Widening Project

The State Road has begun the process of widening Locust Ave to create a turning lane for easier access and better traffic conditions. Some delays are to be expected. Please allow additional time in your commute to and from campus. Also please check your email and felix account frequently for updates and notifications regarding traffic patterns.

RCB Classroom HVAC Replacement

The contractor has mobilized and is onsite beginning demolition of the existing unit. A crane will be onsite tomorrow morning 02/10/2015 to place the new equipment. Contractor will continue with install the rest of the week.

Caperton Center Waterproofing

The Caperton Center waterproofing and brick repair work was bid out last fall 2014. However, upon awarding of the contract the weather would not allow the project to move forward. Certain temperatures are required to apply the materials specified. Currently working with the awarded contractor to schedule the work for this spring once the weather will cooperate.

MS4 Program

An order was granted for an extension on creating and implementing a SWPPP (Storm Water Pollution Prevention Plan) for the Physical Plant to April 2015.
