Construction Update

WEEK 82
2 / 10 / 2014

Caperton Center Re-roofing

Mansuetto and Sons has not began to remove any of the existing roof due to the winter weather we have been experiencing. Based on the weather outlook, the contractor expects to begin the middle of March.

Feaster Natatorium Renovations

Mechanical Engineer was onsite 2/6/2014, to do final inspection of unit. Punch list will be issued to contractor. Coordinating location of data port with IT & contractor so have access to controls from facilities department. Expect the new guardrail for the stair entrance in 1 week and then will install.

Hardway Hall Renovations

Panning is installed on all windows; working on caulking. Expect 4 remaining windows to arrive mid February. Replacement valves arrived 2/5/14 for the faulty valves received from the manufacturer and will be replaced off hours. This will ease the overheating issues experienced in several offices. Continue working on controls and balancing of the 3 building system. Door hardware is near completion. Began installing the toilet partitions; fixtures and accessories will follow. Started ceilings in classroom 318. Began to decrease labor onsite.

MS4 Program

Fairmont State University is mandated by the DEP (Department of Environmental Protection) to serve as our own MS4 (Municipal Separate Storm Sewer System) and no longer fall under the City of Fairmont’s MS4. As of 1/16/2014 FSU’s SWMP (Storm Water Management Program) was approved.

Rain (storm water runoff) from FSU’s property is carried to Coal Run Stream along with many pollutants. This stream has several impairments including pH and fecal coliform. We need YOUR HELP to reduce the pollution entering our local streams and rivers.

Please be mindful that EVERYTHING left on the ground in some form ends up in our streams. YOU can help by picking up after pets, do NOT litter, and many other simple efforts. We need everyone’s effort to control our impact on the environment. To find out more about our MS4 program and how YOU can HELP please check out our website.
