Total Credits

130***

***Note: Students should start in the first semester with the highest math course they can place into, which may be Trigonometry (ACT Math 23), Applied Calculus I (ACT Math 24) or Calculus I (ACT Math 25). This will preserve more options for minors and possible double majors. Total hours are higher than 128 because this model schedule shows prerequisite math courses that are not program requirements but are required if the Math ACT score is less than 24. Math ACT requirements may be satisfied by COMPASS score equivalents.

Specialization electives must be chosen from an approved list.
