

Fairmont State University Allergy Documentation Questions

To assist Fairmont State University Accessibility Services in making a determination on housing/dining accommodations pertaining to allergy disabilities, please provide documentation that addresses the following questions:

- What are the student's specific allergies (please list out all allergens)?
- For each allergen, please specify the contact needed to trigger a reaction (eating, skin contact, airborne, etc...).
- For each allergen, please describe the impact when exposed (stomach irritability, skin reaction, anaphylaxis, etc...).
- Are there certain precautions the student must take when out in public? Any specific to eating out in public?
- For the allergen(s) is cross contamination a significant risk? If yes, please explain the risk.
- What measures does the student take on a daily basis in their living environment to manage these allergies?
