

ACCOUNTING

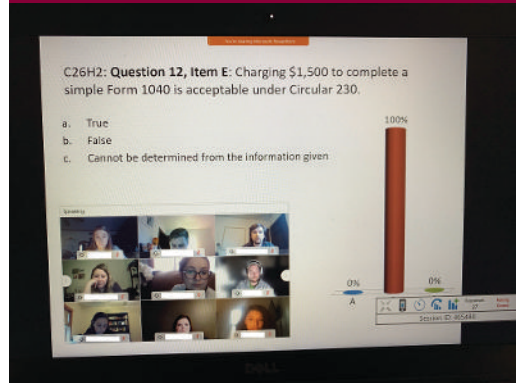

BACHELOR OF SCIENCE IN ACCOUNTING

OVERVIEW OF THE PROGRAM:

The accounting curriculum is designed to provide students with the skills necessary to enter today's workforce, to attain professional accounting certification, or to pursue graduate education. The B.S. in Accounting trains students in the traditional accounting fields of financial accounting, managerial accounting, taxation, information systems, and auditing. Moreover, the program also incorporates the dynamic skill set required of today's business professionals by requiring proficiency in critical thinking, communication, technology, and ethics. The Accounting Program is Accredited by the Accreditation Council for Business Schools & Programs (ACBSP).

EMPLOYMENT OPPORTUNITIES:

Students completing the B.S. in Accounting are prepared for entrance into competitive graduate schools as well as for careers in public, industrial, and governmental accounting. Specific career opportunities include staff accountants, account managers, internal auditors, industrial accountants, financial analysts, and Internal Revenue agents. Over time, our graduates move into senior positions such as controllers, treasurers, chief financial officers, or partners in public accounting firms.
