Program Review
Fairmont State Board of Governors

Program: B.A. Political Science

Date Submitted: February 14, 2014

Institutional Recommendation

The institution is obligated to recommend continuance or discontinuance of a program and to provide a brief rationale for its recommendation:

1. Continuation of the program at the current level of activity;

2. Continuation of program with corrective action (for example, reducing the range of optional tracks or merging programs);

3. Identification of the program for further development (for example, providing additional institutional commitment);

4. Development of a cooperative program with another institution, or sharing courses, facilities, faculty, and the like;

5. Discontinuation of the Program

Rationale for Recommendation:

The faculty associated with the B.A. in Political Science has continued to make improvements in the program. As a result, the program has continued to increase enrollment, retention and graduation numbers. In fact, the number of students majoring in political science has more than doubled over the past five years. In addition, there are over 1,000 students each academic year who take at least one political science course this includes the students who major in the discipline and the service courses offered by the discipline. These successes are achieved in spite of having only two full time faculty members. The continuation of this program is strongly recommended.

EXECUTIVE SUMMARY
for
PROGRAM REVIEW

Name and degree level of program:
Bachelor of Arts in Political Science

External Reviewer(s):
The Fairmont State University Political Science Advisory Committee

Synopses of significant findings, including findings of external review:

The Bachelor of Arts Degree in Political Science is a degree that is designed to provide students with an understanding of the political process in its many manifestations, including the structure of government institutions, the political behavior of individuals and groups, the study of political problems characteristic of modern societies, and a consideration of the interrelationships of institutions at different levels of government.

The following findings have been developed in coordination with the faculty and the Political Science Advisory Committee:
1. Exceptional and caring faculty with real-world experience.
2. Faculty members devote a great deal of time advising and mentoring students. The Political Science program has also been successful over the past five years retaining majors because of advisor involvement reviewing students GPA’s, course schedules, and registration status.
3. Growing enrollment, retention and graduation rates.
4. Accessible faculty members and low student to faculty ratio.
5. Low tuition costs.
6. The success rate of graduates being accepted into top law schools and graduate programs.
7. The success rate of graduates finding professional employment.
Plans for program improvement, including timeline:

The following plans for improvement have been developed in coordination with the faculty and the Political Science Advisory Committee:

1. Continuing to increase enrollment, retention and graduation rates will be one of the major goals in the next five years. This will involve closely monitoring and early advising efforts.

2. Complete assessment data for the program and all individual courses will be collected on a continuing basis.

3. An employer satisfaction survey will be completed within a year.

4. A graduate satisfaction survey will be completed within a year.

5. All Political Science faculty members will have permanent office space and classrooms equipped with working technology within a year.

Identification of weaknesses or deficiencies from the previous review and the status of improvements implemented or accomplished:

There were not any recommendations from the previous five-year program review. Nevertheless, the program of study has been incrementally revised in recent years to reflect needs in the field (e.g. requiring Ethics), increase and diversify upper level course offerings, and increase recruitment and retention.

The political science program lost a tremendous asset when Professor Patricia Ryan retired after 45 years at Fairmont State University.

Continued growth is a major goal of the program. Until this Fall (2013) there were only two full-time faculty members for a program that provides numerous services courses and a stable enrollment of between 36 and 42 majors. Additionally, there are upwards of 30 to 35 National Security & Intelligence students with a double major in Political Science. In Fall 2013 a new professor was hired with shared duties in National Security & Intelligence and Political Science, thus increasing the number of Political Science faculty by one-half. The political science program produces a significant profit for the institution and additional faculty support is necessary.

There is great concern about the off campus courses offered. Even though the University “owns” all of the political science courses, Pierpont Community and Technical College hires instructors to teach courses in the off campus branches. This is not coordinated with the College of Liberal Arts or the full-time faculty members. Furthermore, there are numerous sections of dual enrollment high school courses offered through Pierpont.
There is a serious concern about the adequacy of facilities and technology. We currently have two faculty members in temporary offices and one faculty member who does not have an office. Furthermore, we struggle to find available classrooms. Technology is also a concern. Many of the classrooms on campus are not equipped with adequate technology. In the basement of Hardway Hall, where the majority of our classes are held, it is virtually impossible to access wi-fi, for example. Technology issues extend beyond the physical classroom. The Outlook program (i.e. university email) does not allow faculty to access their email accounts off-campus beyond a few minutes before being disrupted. The same happens with the Blackboard system. This seriously inhibits all faculty-to-student communication. We live in a world where efficient technology is essential to both teach and communicate with students.

**Five-year trend data on graduates and majors enrolled:**

The number of majors has remained stable over the five-year period despite overall enrollment decline at the University (See Table 1 below). Again, this does not include the number of double majors, as nearly all of the National Security and Intelligence majors also major in Political Science. Additionally, and more importantly, the number of political science graduates has increased by fifty percent.

**Summary of assessment model and how results are used for program improvement:**

Assessment for the Political Science program is based on student scores on written research papers, oral presentations, and examinations. Performance on all oral and written assignments has been well above the targeted goal.

Despite being small, the Political Science Program boasts a quality curriculum and staff. The political science staff has made and continues to make great strides in the assessment area. The political science program and Fairmont State University document assessment materials in Taskstream. This program provides an archive for program documentation, and a database for program analysis and improvement. A review of the program’s outcomes and assessments along with individual course outcomes and assessments have occurred over the past five years as part of the program’s assessment plan. This assessment process is now embedded in the program and will continue. In addition, the
Political Science program will begin using a major field test starting spring 2015 to assist in determining whether the program outcomes have been met.

**Data on student placement:**

The data regarding placement of political science majors graduating from Fairmont State University from 2009-2013 has been collected primarily through personal contacts between faculty members and their former students and resulting requests for reference letters. This data indicates that well over half the graduates do not seek immediate employment upon graduation but go on to enroll in graduate programs in political science, policy studies, public administration, or law school.

Our majors have been accepted into the following law schools and graduate programs: Vanderbilt University, Boston University, William and Mary, Wake Forest, Emory University, Villanova University, University of Miami, University of Pittsburgh, West Virginia University, Michigan State University, and Penn State.

Those who join the workforce have obtained employment with the Central Intelligence Agency, the Defense Intelligence Agency, United States Navy, United States Air Force, United States Army, the Federal Bureau of Investigation, out of state business firms, local government, and the Defense of Department.

**Final recommendations approved by governing board:**
The Political Science curriculum is designed to provide an understanding of the political process in its many manifestations, including the structure of government institutions, the political behavior of individuals and groups, the study of public problems characteristic of modern societies, and a consideration of the interrelationships of institutions at different levels of government.

The principle objectives of the Political Science Program are:

1) To lay a basic understanding of governmental and administrative processes for individuals planning public service careers in national, state, or local government.

2) To foster an understanding of the substance and methods of the study of government and politics as preparation for graduate work in political science or public administration.

3) To provide thorough training for students anticipating law school.

Courses allow students to concentrate in broad fields and to develop more specialized programs reflecting their particular interests. Generally, 1100-2200 level courses are survey courses and 3300-4400 level courses cover more specific topics. While both the major and minor in political science typically consists of necessary introductory work, the faculty strongly urges students with a minor in political science to take the Seminar in Political Science (POLI 4470). Schedules should be planned in consultation with an advisor, and students are encouraged to explore a variety of courses. Eligible students are also encouraged to intern in Washington, D.C. with the Washington Center for Internships and Academic Seminars.
VIABILITY

ENROLLMENTS

Applicants, Majors, and Graduates

Admission requirements for political science majors are the same as those for all bachelor degree programs. Applicants must be graduates of approved high schools who have a 2.00 high school grade point average (GPA) and a minimum composite score of 18 on the Enhanced American College Test (ACT) or 870 on the Scholastic Aptitude Test (SAT) or at least a 3.0 high school GPA and SAT or ACT test scores. Applicants must also satisfy the following minimum high school requirements:

Required Units (years)

<table>

<td>10</td>
<td>10</td>
<td>12</td>
</tr>
</tbody>
</table>

NOTE: The above numbers do not reflect double majors. Nearly all of the National Security and Intelligence majors also double major in Political Science.
Program Courses

During the program review time frame, Political Science required completion of 128 credits for graduation (See Appendix I for old program). Per HEPC mandate, and beginning with the Fall 2013 semester, completion of the degree now requires 120 credits. Additionally, along with the new 120-credit degree, a new General Studies Program was adopted for the University.

Candidates for the Bachelor of Arts degree in political science must now complete 39 semester hours in political science and as many hours as are required by the minor of their choice.

Political Science majors are required to take the following courses:

<table>
<thead>
<tr>
<th>Course</th>

<td>3</td>
</tr>
</tbody>
</table>

**TOTAL CREDIT HOURS** 24

In addition, political science majors must take 15 semester hours of advanced (3300/4400) political science course electives chosen with the advisor’s approval. All political sciences courses currently offered are listed in Table 2 below. It should be noted that there are ten political science courses listed in the catalog (and not on this list) which have not been offered in the past five-to-ten years due to lack of number of faculty/lack of faculty expertise/lack of current relevance. The plan is to remove these courses from the curriculum or modify/update them after the next permanent hire (thus filling Dr. Ryan’s position) and no later than the next program review.

</tbody>
</table>

Students are also required to complete **30 semester hours**, outside the major, of **general studies** requirements. The new general studies program consists of sixteen attribute categories that include:

1. Critical Analysis (English 1108)
2. Quantitative Literacy (mathematics)
3. Written Communication (English 1104)
4. Teamwork (satisfied with major course requirement)
5. Information Literacy (English 1108)
6. Technology Literacy (English 1109)
7. Oral Communications (English 1109)
8. Citizenship (History 1107 or 1108)
9. Ethics (satisfied with major course requirement)
10. Health and Well-being (Fitness and Wellness 1100)
11. Interdisciplinary and Lifelong Learning (satisfied with major course requirement)
12. Fine Arts (introductory courses in Fine Arts)
13. Humanities (History or Philosophy course)
14. Social Science (Criminal Justice 3310)  
15. Natural Science (introductory science course)  
16. Cultural Awareness (History or Criminal Justice course).

Finally, students must take 33 hours of electives of their choice (free electives). This freedom of choice allows many students to select an additional major or minor, or specific courses to boost their marketability.

Course enrollments over the five year period remained relatively stable (see Table 3 below). Under the new general studies requirements, POLI 1103 – American Government is one of only three courses which fulfill Attribute 8 (Citizenship); therefore, we anticipate the need to offer additional sections of the course in the future. Success rates included the percentage of students enrolled in the course and passed the course with a grade of D or better. Students who withdrew from the course, received an I(Incomplete) or grade of F were not included in the success rate.

Service Courses

The Political Science Program serves the B.A. and B.S. curriculum by offering the following courses: American Government, Introduction to Political Science, World Religions and Politics, Principles of International Relations, Comparative Government, Research Methods and Analysis, International Law and Organizations, and Terrorism.

The National Security and Intelligence Major requires seven political science courses including: World Religion and Politics; American Government; Principles of International Relations; Comparative Government; Research Methods and Analysis; International Law and Organizations; and Terrorism.

In addition, four political science courses are either required or recommended for the university-wide General Studies curriculum (American Government, Introduction to Political Science, Principles of International Relations, and Comparative Government) as well as electives in a number of other programs such as Criminal Justice, and National Security and Intelligence.

Please see Table 3 above for enrollments of service courses.

Please see Table 6 for course outcomes for the four service courses for the general studies curriculum.

Off Campus Courses

During the past five years, over 50 sections of political science have been offered in off-campus locations (see Table 4 below). Most were introductory level services courses (e.g. American Government and Introduction to Political Science). Most were presented at the Caperton Center and the remainder were presented at other sites in the service area (Lewis, Monongalia, and Randolph). The College of Liberal Arts has very little, if any, input concerning courses offered off campus. They are technically “owned” by the University; however, compensation and offerings are determined by Pierpont Community
and Technical College. Of particular concern are dual high school enrollment courses offered off-campus. The full-time faculty members recognize the necessity of offering off-campus courses, however, there is concern about the lack of coordination and consultation with the main campus faculty especially since the American Government course is generally a gateway course for many students who ultimately choose political science as their major.

**Cost/Student Credit Hour**

Cost per student credit hour was calculated as follows (and is only an estimate):

- In-state tuition and fees per academic year: $5,824
- Average number of credit hours taken per year by students: 30

This equals $194 per credit hour which is **$582 per three hour political science course.**

The political science course enrollments for academic year 2012-2013 totaled 1,073 (from **Table 3** above).

Therefore, political science courses generated $624,486 during the academic year.

The cost of delivering the Political Science Program is estimated to be far below the institutional average of cost per student FTE major. (See **Table 5 below for additional information**)

In order to continue to maintain and grow, the Political Science department requests that an additional faculty member be hired in light of the significant amount of money generated through the program.

General Studies Requirements Met
During the previous five year period, students had to successfully complete 128 semester hours and 38 hours of general studies requirements (see Appendix I for the old Political Science curriculum and Appendix II for the old general studies curriculum. Beginning with the current academic year, students must complete 120 semester hours for the degree and 30 hours of general studies courses outside the major (see Appendix III for the new curriculum and Appendix IV for the new general studies curriculum.

Assessment Requirements
The political science program has made and continues to make strides in the assessment area. The political science program and Fairmont State University now document assessment materials in TaskStream. This program provides an archive for program documentation, and a database for program analysis and improvement. Program, as well as course outcomes and assessment techniques have been finalized. The political science program outcomes ensure that graduates are able to:

a) Demonstrate an understanding of the discipline of political science with its many subfields, models, and approaches.
b) Demonstrate basic knowledge and understanding of political institutions and processes of the government of the United States.
c) Demonstrate knowledge of a broad range of political systems, the global political order, and contemporary world politics.
d) Demonstrate knowledge of the political ideologies that serve as the foundation for political systems.
e) Demonstrate the ability to apply the different methodologies and techniques of research in political science and to conceptualize problems and apply analytical tools to solve them.
f) Demonstrate the ability to write and speak with clarity and precision so as to effectively communicate facts and thoughts.
The assessment is based upon the student’s performance in the senior seminar (Capstone) course. The seminar provides an opportunity for the entire Political Science faculty to observe, examine, and assess each individual student. Each student will be required to write and present a major research project that demonstrates critical thinking, mastery of the topic, an understanding of the discipline, analysis, as well and written and communication skills.

All 1000-level and 2000-level political science course outcomes, assessments, and satisfactory completion standards have been developed and adopted. See Table 6 below.

The Political Science program is adopting a Political Science major field test and implementation is planned for spring semester 2015. This is a nationally developed test that will provide objective evidence that students majoring in political science are meeting the student learning outcomes for the program. This test will also assist the political science program in measuring and demonstrating the educational quality of the program. In addition to these measures, the program maintains a very close and active relationship with its Political Science Advisory Committee.
The committee consists of the following members:
Professor Laurie R. Blank, Emory University Law School
Dr. Alison Milofsky, United States Institute of Peace
Professor Kevin Brew, United States Naval War College
Sandra Hodgkinson, Vice President of DRS Technologies
Jack Broderick, Central Intelligence Agency
David Hodgkinson, National Counter Terrorism Center
Russell J. Verby, United States Department of Justice
Jonathan I. Shapiro, The World Bank Group

Committee recommendations for the program have been incrementally implemented over the past five years. One of the key recommendations was the addition of a required ethics course. Additionally, two of our most popular and regularly-scheduled courses (2204- Introduction to Public Administration and 2205-State and Local Government) were previously offered at the sophomore level, but were modified and raised to the upper–division junior level with more rigorous substance. Table 7 below shows the old and new courses along with the course numbers, titles and catalog descriptions.

TABLE 7
COURSE CHANGES FOR POLITICAL SCIENCE

<table>
<thead>
<tr>
<th>POLI 2204 - Old Course</th>
<th>Introduction to Public Administration</th>
<th>An introductory study of the origins, structures, and processes of government administration.</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLI 3300 – New Course</td>
<td>Public Administration</td>
<td>Explores the politics of public administration. The course studies the origins, structures, and processes of government administration with a focus on administrative politics, law and ethics, organizational theory and technical fields, such as budgeting, planning, and personnel. Public administration involves the bureaucracy in the implementation of politics often authored by other institutions of government (the legislative, executive, and judicial branches).</td>
</tr>

<table>
<thead>
<tr>
<th>POLI 2205 – Old Course</th>
<th>State and Local Government</th>
<th>A study of the structure and function of American state and local governments.</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLI 3302 – New Course</td>
<td>State and Local Government</td>
<td>This course is designed to explore American state and local government structures and functions while focusing on constitutions, institutions, instruments of popular control, and intergovernmental relations. This course will examine a number of topics having to do with state and local politics with an emphasis on comparing states and extra attention on the state and local government in West Virginia.</td>
</tr>
</tbody>
</table>
Adjunct Use

The political science program has two full-time faculty members. There were three full time faculty members until 2005 when a faculty member retired and was not replaced. This is an area of concern because the program has more than doubled over the past five years. Therefore, the Political Science program on the main campus at Fairmont State University generally requires two to three courses per semester taught by adjunct faculty members. It is difficult to attract adjunct faculty members because the adjunct faculty pay is relatively low compared to other institutions such as West Virginia University. Also, the adjunct budget for the College of Liberal Arts is modest. However, the quality of adjunct faculty members off campus is not known because the College of Liberal Arts and the main campus political science full-time faculty members do not have any coordination or consultation concerning off campus courses. Pierpont University and Technical College employs those adjunct faculty members even though the courses are technically “owned” by Fairmont State University.

Graduation / Retention Rates
Retention rates of political science majors is improving as evidenced by the graduation rate increasing from 8 in academic year 2008-2009 to 12 in academic year 2012-2013. Equally important is the overall rise in majors from 54 in academic year 2008-2009 to 69 in academic year 2012-2013. As previously mentioned these numbers do not reflect the 45 National Security and Intelligence who are double majors in Political Science. The Political Science program has been able to increase retention and graduation rates by increasing advisor contact. Also, the political science faculty members host at least one meeting a semester mandated for all political science majors. This is an opportunity to receive feedback from the students in a group setting as well as discuss future course offerings with students.

NOTE: The above numbers do not reflect double majors. Nearly all of the 45 National Security and Intelligence major also double major in Political Science.

Previous Program Review Results
The previous program review results submitted April 2009 resulted in continuation of the program with no corrective action.
Program Requirements

General Studies (min 30)  30 hours
Major (32-65)  39 hours
Minor  18 hours
Electives (min 21)  33 hours
TOTAL (max 120)  120 hours

Please see Table 2 for a list of the specific courses and Appendix I for the curriculum.

Faculty Data
Please see Appendix II for faculty data sheets.

Accreditation/National Standards
The Political Science program does not hold or require special accreditation.
Fairmont State University is accredited by the Higher Learning Commission and is a member of the North Central Association, 30 North LaSalle Street, Suite 2400, Chicago, IL 60602.

Facilities/Technology
There is a serious concern about the adequacy of facilities and technology. We currently have two faculty members in temporary offices and one faculty member who currently does not have an office. Furthermore, we struggle to find available classrooms. Technology is also a concern. Many of the classrooms are not equipped with adequate technology. Technology issues extend beyond the physical classroom. The outlook program does not allow faculty to access their email accounts off-campus beyond a few minutes before being disrupted. This seriously inhibits faculty to student communication.

Strengths / Weaknesses
In order to continue to grow and maintain the Political Science department requests that an additional faculty member be hired in light of the significant amount of money generated through the program. It is also imperative that faculty members have permanent office space. In addition, the technology must be improved both in the classroom and virtually. We live in a world where efficient technology is essential to both teach and communicate with students.
Placement and Success of Graduates

There is little data available regarding job placement of political science majors graduating from Fairmont State University from 2009 through 2013. Nevertheless, information collected through personal contacts between faculty members and their former students and resulting requests for reference letters indicate that well over half the graduates do not seek immediate employment upon graduation but go on to enroll in graduate programs in political science, policy studies, public administration, or law school.

Our majors have been accepted into the following law schools and graduate programs: Vanderbilt University, Boston University, William and Mary, Wake Forest, Emory University, Villanova University, University of Miami, University of Pittsburgh, West Virginia University, Michigan State University, and Penn State.

Those who join the workforce have obtained employment with the Central Intelligence Agency, the Defense Intelligence Agency, United States Navy, United States Air Force, United States Army, the Federal Bureau of Investigation, out of state business firms, local government, and the Defense of Department.

The political science program makes every effort to further the ambitions of its majors by posting on the department’s bulletin board and disseminating information of interest to job seekers on positions available in-state, out-of-state, or abroad. Students are regularly told of opportunities advertised in professional literature whenever appropriate. This information is also shared with the Placement Office and other relevant departments. Faculty members also encourage capable students to consider furthering their education by providing them with information on graduate programs, internships, and scholarships available to them.

Similar Programs in West Virginia

Although Bachelor of Arts degree programs in political science are offered at West Virginia University, Alderson Broaddus, West Virginia Wesleyan, and Glenville State University, Fairmont State University serves a different clientele. Students attending Fairmont State University come from a different socio-economic background than a large university or a private school. Many come from the immediate local area and would not consider going to another institution. Students choose Fairmont State University over a larger institution because its size is less intimidating. Students also choose Fairmont State University in order to have smaller class sizes and faculty that know their names. Fairmont State University also draws heavily from the veteran population on campus because two of our faculty members are veterans and in the United States Naval Reserve. Students can also enroll first in Pierpont Community College and, if successful, they may
continue their studies at Fairmont State University. Proximity to West Virginia University is an advantage, however, because our students can participate in some activities that Fairmont State University cannot afford to provide students.

**CONSISTENCY with MISSION**

The political science program relates fully to the mission of the institution as it endorses one to “discover roles for responsible citizenship that promote the welfare of all.” Political science is closely linked to the liberal arts tradition. Politics is the oldest and most universal of human activity. The study of political science is organized to give students an understanding of the institutions of government and the decision making process and help them become informed citizens who have the knowledge and skills they need to think scientifically about politics and political choices. Future leaders and citizens in West Virginia would benefit from participation in the political science program. At the very least, the political science faculty members believe that it should be required for all students attending Fairmont State University to enroll in the American Government course. This would ensure that all of Fairmont State University graduates “discover the roles for responsible citizenship…”

Additionally, the Political Science Program Mission Statement and Profile of a Political Science Graduate have been developed.

**Political Science Program Mission Statement**

The Political Science Department’s mission is to provide an understanding of the political process in its many manifestations, including the structure of government institutions, the political behavior of individuals and groups, the study of public problems characteristic of modern societies, and the consideration of the interrelationships of institutions at different levels of government. The Department seeks to provide an understanding of governmental and administrative processes and the substance and methods of the study of government in order to prepare for public service, graduate school, and/or law school. The ultimate goal is that the political science student becomes a participant in the local, state, and international community.

**Profile of a Political Science Graduate**

The Political Science Department’s graduate has an understanding of the political process in its many manifestations, including the structure of government institutions, the political behavior of individuals and groups, the study of public problems characteristic of modern societies, and the consideration of the interrelationships of institutions at different levels of government. The typical graduate will work in public service at the local, state, national and/or international level including government, military, and/or nongovernmental capacities. Many graduates will also continue their education in Political Science, International Relations, Public Administration, Public Relations, Journalism, and the Law.
APPENDIX I
OLD CURRICULUM

BACHELOR OF ARTS IN POLITICAL SCIENCE = 128 hours
Political Science Curriculum = 36 hours
Liberal Studies Requirements = 38 hours
Minor = 18 hours
Free Electives = 36 hours

POLITICAL SCIENCE CURRICULUM = 36 hours
Required Political Science courses = 21 hours
