

## **Antivirus software:**

Students must first log in to the Mycampus portal from the [Fairmont State University](#) home page. Hover over the Departments tab in Mycampus to bring up a drop down menu. Scroll down to Information Technology, then select TLC. Find the Antivirus Download heading and click the green button on the right to expand the section. Click to download the software. Enter students\uca into the UCA field and your UCA password into the password field. Run when prompted.

Faculty and Staff can also download the software from these locations. However, when prompted faculty and staff are only required to put in their UCA and password.
