

## **I am a student living in the dorms. How do I connect my gaming system to the Campus network?**

The current campus network security model does not support gaming on the wireless network. You will not be able to connect your game system to wifi. If your system is not plugged in to a working network port, it will not work.

Please remember the following steps when getting a game system registered to the network:

1. First make sure to plug your system in to a working network port.
2. Second, leave your game plugged in and turned on until it connects. It may take several hours.
3. Third, ONLY IF steps 1 & 2 have failed, email [help@fairmontstate.edu](mailto:help@fairmontstate.edu) & include the following information:
  1. Your Name
  2. Your UCA
  3. Your Dorm Room and Building
  4. Your phone number
  5. Your email address
  6. Your device type and it's wired MAC address
