

Installing AnyConnect Client

- 01) Begin installation off campus. Open Internet Explorer (IE works best to install the client). Go to <https://fsuvpn.fairmontstate.edu>.
- 02) Select “Employee” and use your UCA to log in.
- 03) Select the “AnyConnect” bar on the left.
- 04) Select “Start AnyConnect”. The installation should automatically start. If not, select “download”.
- 05) AnyConnect should now be installed and will show “Connection Established”.
- 06) You can log off and close the browser. In the status bar, you will still see you are connected; AnyConnect is now separate from the browser.
- 07) You can right click the AnyConnect icon on the status bar and select “Disconnect” or “Quit”.

Starting AnyConnect Client

- 08) Launch the AnyConnect client by going to Start > All Programs > Cisco > Cisco AnyConnect Secure Mobility Client > Cisco AnyConnect Secure Mobility Client. You can create a desktop shortcut from here by right clicking on Cisco AnyConnect Secure Mobility Client > Send to > Desktop (create shortcut).
- 09) Open AnyConnect and click “Connect”.
- 10) Select “Employees”.
- 11) Log in using your UCA username and password.
