

Virtual Computer Issues:

1. If you are using a computer in the library and the screen goes black, do not log off of that machine. Move to another virtual computer and log in as you normally do with your student UCA and password. Everything you were working on at the other computer should be pulled to the new one, and none of your work will be lost.
2. You will not need to go back to log off of the other computer at all, and no one else will be able to access your work if someone uses that computer later.
3. Please make sure to save your work often to a jump drive or your U: drive!
